**Important Note When Interpreting the Findings**

The findings are based on self-reported survey data collected at one point in time. We cannot make claims of causality (e.g., deportation concerns cause poor sleep quality), and students' experiences likely change over time. Further, undocumented college students are a diverse group of students. Their experiences may vary by nationality, race, religious identity, gender, sexual orientation, socioeconomic status, type of college, having DACA or not having DACA, attending college in a particular state, etc. Lastly, experiences reported here may not be generalizable to the larger population of undocumented college students in the United States.
Recruitment: Between January and June 2019, Dr. Jennifer Kam emailed recruitment flyers to Undocumented Student Services, “DREAM” Centers, and Undocumented Student Associations at four-year colleges and community colleges in 10 states, including AZ, CA, IL, TX, and MA.

Participant Payment: $10 Amazon gift cards for filling out the 25-minute online survey.
